PERSONAL PROJECTS

Portfolio Website Using React Js (12/2023 - 12/2023)

- personal portfolio link <https://rishavsarkar.vercel.app/>

E-Commerce Site Using Django (01/2023 - 02/2023)

- It incorporates user authentication for a secure and personalized experience.
- password reset functionality has also been implemented, enabling users to regain access to their accounts easily.
- Users can filter products based on price or company name. Multiple delivery addresses can be conveniently added to user profiles with shopping cart feature.
- The RazorPay API has been integrated to facilitate seamless online payments.

To-Do Application Using React Js (12/2023 - 12/2023)

- user can add , delete , edit specific to-do and also can mark specific to-do as complete to-do .
- user can login and logout in the application.
- user can filter to-do list as complete and incomplete to-do.
- used react-router for navigation and implemented route protection , context-API for global state management.

Personal Chat Application Using Django-Channels (04/2023 - 05/2023)

- The chat application has been developed using Django-channels, incorporating user authentication.
- The project allows users to engage in real-time one-to-one conversations.
- Users can easily determine the online or offline status of other users, and receive notifications for unread messages.

User Authentication API With JWT Using Django REST Framework (03/2023 - 04/2023)

- The project focuses on user authentication, allowing users to sign up and log in.
- JWT (JSON Web Token) authentication is used for user authentication.
- Only authenticated users have access to their profile details and can change their password through a link sent to their email address.

Blog Application Using Flask (02/2022 - 03/2022)

- The admin has the ability to post blogs, as well as edit or delete any specific post conveniently.
- a WYSIWYG editor called Summernote has been integrated. This allows the admin to create or modify posts easily by providing a visual representation of the content.
- Visitors can express their opinion on the posts by liking or disliking them. Additionally, they have the option to leave comments.
- completing a contact form, an email is sent to the appropriate recipient, facilitating communication between the website and its users.
